

Villa in Marbella

1,690,000 €

Reference: 437-01375P **Bedrooms:** 5 **Bathrooms:** 4 **Plot Size:** 522m² **Build Size:** 503m²

Location: Marbella

Newly built on individual plots with an innovative design, these villas are bright and spacious, with a garden and swimming pool.

All the houses are finished with high-quality materials:

- Radiant floor heating throughout the entire house • Lift
- PORCELANOSA quality
- Wood flooring on first floor

The eight villas are being built on a plot located in the area known as Valdeolletas.

Quiet streets with schools, nursery schools, El Mirador paddle club, Monte Paraíso Golf and Country Club, etc.

And very close to the centre of Marbella as well: less than 5 minutes from the Don Pepe Hotel going down Avenida Cánovas del Castillo, and less than 5 minutes from La Cañada Shopping Centre.

The Villas

The basement floor is a common area for all villas, with parking spaces and access to each villa by private lift.

Patio floor: 100 square metres divided into 2 rooms with natural light, for use as a gymnasium, a playroom, a library, etc., and one bathroom.

Ground floor: A large elegant, functional open space, with Living Room-Dining Room- Kitchen, and a guest toilet.

First floor: 3 bedrooms, 3 bathrooms and terraces. Terrace floor: One toilet, a pergola and a large solarium.

The Light of the Mediterranean

Large windows to let the natural sunlight in

The floor to ceiling sliding windows, with tracks embedded in the floor, allow the indoor and outdoor areas to blend perfectly and enhance the concept of outdoor living.

Four of the villas face south-east, and the other four face south-west. All of them have magnificent sea views.

FOUNDATIONS

The villas foundations will consist of a reinforced concrete slab on top of a layer of gravel. The perimeter walls will be built with reinforced concrete up to the ground floor slab. A certified technical control body will supervise the execution of the works, which shall comply with the specifications of the Geotechnical Study and structural regulations in force.

STRUCTURE

The structure consists of metallic frames, with waffle slabs and solid concrete base plates. The structure's steel reinforcements will be interconnected with a grounding ring in order to divert electrical current outside the villas.

ROOFS

The roofs will be walk-on in habitable areas, with the exception of the roof above the upper terrace, which will not be walk-on. The walk-on roofs will be built with slopes, acoustic-thermal insulation and polymer waterproofing membrane, and finished with top quality non-slip ceramic tiles.

Non walk-on roofs will be built with thermal insulation and finished with gravel.

FAÇADE

INTERIOR PARTITION WALLS

Double self-supporting walls made of plaster fibreboards on galvanised steel profiles and rockwool acoustic insulation.

Ceilings made with gypsum fibreboards with perimeter trims in accordance with the project for indirect lighting.

In secondary bathrooms the ceilings will consist of modular panels to allow access to climate control units. Bathroom partition walls will be made with water-repellent gypsum panels.

The façade will give the house a modern appearance, providing an excellent thermal behaviour.

FOUNDATIONS

The villas foundations will consist of a reinforced concrete slab on top of a layer of gravel. The perimeter walls will be built with reinforced concrete up to the ground floor slab. A certified technical control body will supervise the execution of the works, which shall comply with the specifications of the Geotechnical Study and structural regulations in force.

Depending on the area, it will consist of a concrete and brick wall plastered with a layer of cement mortar

and finished with a high-quality light-colour paint and combination of different textures. The façade will have an inner chamber with thermal and acoustic insulation, and dry-wall lining.

There will be areas with a transparent façade made with high-quality aluminium profiles with safety double

glazing with an air chamber.

RENDERING

Finishing of interior walls and ceilings with smooth acrylic paint.

The ground floor and patio floor will have large porcelain floor tiles: 80x80 cm PORCELANOSA tiles, Bottega Acero, Bottega Caliza or Harlem Acero models, to be chosen by the client.
