Country house at only a few meters of the Senija village. The property of over 136 sqm is located on a nearly flat plot of over 20.000 sqm. The property needs a total reform although the roof of the main house is new. The house is distributed as follows: Huge covered porch with bread oven, water deposit, lounge with burning fireplace, old kitchen and two double bedrooms. Next to the main property we find an open area easily to be converted into a yard or as a part of the living area. The nearly flat plot has a good access and the electricity and water connections are at the same edge of the land. Nice opportunity to be living at the country but at walking distance to the town of Benissa and Senija. The visits are more than suggested to appreciate the location and the surroundings.
